

A NEW CONCEPT IN CLEANING

WET-WRING-WIPE-WALK AWAY

From Sweden and Olsson Cleaning Technology comes a revolutionary new product called *Tergo*. These ULTRA MICRO FIBER cleaning tools are a patented polyester and nylon weave that with its natural forces can be used without chemicals. With *Tergo* the only cleaning chemical you use is WATER!! And it's the cloth that does the work. From toddlers to seniors, it's fun, easy and environmentally friendly.

WHAT'S WHAT

Tergo WINDOW CLOTH (flat woven cloth) is specially designed for windows, mirrors, glass, crystal and other similar surfaces. This cloth has the property of cleaning and drying at the same time. No need to dry or polish the surface.

Outside or 1st time use: Take a bucket of water with you. We recommend using a Duster/Multi cloth damp to remove excess dirt and previous cleaner's residues, then wipe with lightly damp window cloth.

Tergo OPTICAL (small woven cloth) may use dry to clean eyeglasses, CD's, optical and camera lenses.

Tergo DUSTER/MULTI CLEANER (knitted loop cloth) was developed for dusting (dry) and general cleaning (damp). A unique feature of this cloth is when used dry for dusting, dust does not return as quickly as before. Use damp as a multi-purpose cloth for cleaning virtually any surface with a wipe. You're just limited by your imagination. Great for blinds, plants, electronics, furniture, vehicle interiors, spring cleaning, fabrics and stains in carpets.

Tergo SCRUBBIE (white or brown with green stripes) takes the scrub out of cleaning. Use for tubs, showers, shower doors, sinks and taps, walls and floors or any heavily soiled areas. .

Tergo KITCHEN CLOTH (tight knit with light stripe) designed for the fats and greases in the kitchen. Brings the natural shine back to the all appliances, counters, cabinets with a wipe. Can also use with a mild dish soap to wash dishes.

Tergo DRYING TOWEL designed for absorption up to 4 times its weight. Use as a kitchen, swimmers, pet drying or golfing towel.

Tergo MICRO FIBER MOPS a lightweight aluminum telescopic handle and swivel head with wet and dry cloth attachments for floors, wall, and ceilings.

HOW TO USE

WET *Tergo* loves hot water. It makes the micro fibers swell. **WRING** Use only damp. Even shake the excess water out of the cloth to assure only damp. **WIPE** The micro fiber material in the cloth has the property of cleaning and drying, therefore there is no need to dry the surface. **WALK AWAY.**

PRODUCT CARE

It is necessary to wash *Tergo* cloths on a regular basis to assure their use for a long period of time with satisfactory results. **EASY** with mild detergent you can 1) **Hand wash** soiled cloths; rubbing fibers together to loosen ingrained dirt. (Make sure you rinse all the soap out of the cloths). Or 2) **machine wash** separately from towels in hot water. **Periodical boiling** of all cloths (5 minutes in a pot of water on top of the stove) disinfects fibers and releases trapped dirt. There may be a colour burst from new material so separate colours. **HANG TO DRY.** Do not use fabric softeners or conditioners as it damages the cloth's micro fibers. Chlorine bleach or bleaching agents do damage fabric fibers and shorten the life of the cloths. Otherwise **NO CHEMICALS OR ABRASIVE CLEANERS.** Longevity guarantee of Tergo cloths is a minimum of 2 years and has surpassed 600 launderings.
